COMPOSITES ENGINEERING

An International Journal

Editor-in-Chief

Professor David Hui, Department of Mechanical Engineering, University of New Orleans, Lakefront, New Orleans, LA 70148, USA. Tel. 504-286-6192. Fax 504-286-5539. email dxhme@uno.edu.

Production Editor: Juliet Kahan, Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK (Tel. UK-865-843889; Fax UK-865-843923. e-mail m.howells@elsevier.co.uk).

Publishing, Subscription and Advertising Offices

Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK (Tel. UK-865-843000; Fax UK-865-843010); Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, USA.

Subscription Rates

Published monthly in 1994. Annual Institutional Subscription Rates 1994: North, Central and South America, US\$830, Rest of World £540. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.

Second class postage paid at Newark, NJ and additional mailing offices. Postmaster send address corrections to *Composites Engineering*, Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, USA.

Subscription Enquiries

Subscription enquiries from customers in North America should be sent to: Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, USA, and for the remainder of the world to: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK.

Back Issues

Back issues of all previously published volumes, in both hard copy and on microform, are available direct from Elsevier Science offices.

COMPOSITES ENGINEERING

An International Journal

AIMS AND SCOPE

In response to the growing use of composites in the aerospace, mechanical and ocean engineering industries across the world, the international journal *Composites Engineering* will serve as a forum for the publication of original papers in the broad area of composite materials and engineering structures.

The journal will seek submissions from authors on theoretical and experimental investigation of composite structures and materials. Particular emphasis will be placed on the design and analysis of new structures and new materials in all application areas but particularly in the new vehicle-related environments.

The journal will specifically deal with the design and manufacturing of composite materials as intended for and used in engineering structures and their performance under high temperatures, high stresses and corrosive environments. Other aspects included will be buckling, vibration and non-linear behaviour of structures made from these novel materials.

Letters to the Editor, reviews and announcements of forthcoming conferences are invited.

Disclaimer: Whilst every effort is made by the publishers and editorial board to see that no inaccurate or misleading data, opinion or statement appears in this journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly, the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

CONTENTS OF VOLUME 4

NUMBER 1

USE OF COMPOSITES IN FUNCTIONALLY GRADED MATERIALS

Marek-Jerzy Pindera, Steven M. Arnold, Jacob Aboudi and David Hui	VII Foreword
Jacob Aboudi, Steven M. Arnold and Marek-Jerzy Pindera	1 Response of functionally graded composites to thermal gradients
Joseph Zuiker and George Dvorak	19 The effective properties of functionally graded composites—I. Extension of the Mori-Tanaka method to linearly varying fields
Mauro Ferrari	37 Composite homogenization via the equivalent poly-inclusion approach
D. B. Gundel and F. E. Wawner	47 The influence of defects on the response of titanium/SiC fiber composites to thermal exposure
Paul E. Cantonwine and Haydn N. G. Wadley	67 The effect of fiber-matrix reactions on the interface properties in a SCS-6/Ti-24Al-11Nb composite
John J. Lannutti	81 Functionally graded materials: properties, potential and design guidelines
Christopher Rabzak, Dimitris A. Saravanos and Christos C. Chamis	95 Optimal synthesis of hot composite laminates with inter-phase layers
J. M. Duva, B. R. Olson and H. N. G. Wadley	107 Functionally graded materials for yield suppression at stress concentrators
Robert S. Salzar and Furman W. Barton	115 Residual stress optimization in metal-matrix composites using discretely graded interfaces
Marek-Jerzy Pindera, Todd O. Williams and Steven M. Arnold	129 Thermoplastic response of metal-matrix composites with homogenized and functionally graded interfaces
David Hui	147 List of Reviewers for Vol. 3 (1993)
	149 Announcements

NUMBER 2

Esther Feldman and Jacob Aboudi	151 Postbuckling analysis of metal-matrix laminated plates
--	--

J. Mistry and F. Levy-neto	169	A procedure for analyzing the strength of composite domes by axisymmetric shell finite elements
Gajbir Singh, G. Venkateswara Rao and N. G. R. Iyengar	181	Bifurcation buckling of unsymmetrically laminated plates
Ch. Wolff, P. Bastid and A. R. Bunsell	195	Relation of energy absorption of composite structures to material strength
J. T. Tzeng and L. S. Chien	219	A thermal/mechanical model of axially loaded thick-walled composite cylinders
H. M. Shang, F. S. Chau, C. J. Tay, S. L. Toh and L. M. Tham	233	A simple model for sizing unbonds in foam-adhesive bonded laminates from shearographic fringes
S. W. Gong, S. L. Toh and V. P. W. Shim	247	The elastic response of orthotropic laminated cylindrical shells to low-velocity impact
David Hui	267	List of Reviewers for Vol. 3 (1993)
	269	Announcements

NUMBER 3

C. Q. Ru and R. C. Batra	271	On the interface stability of a neck propagating in a sheet reinforced with shape-memory fibers
C. O. Horgan and J. G. Simmonds	279	Saint-Venant end effects in composite structures
Gregory J. Czarnecki	287	The significance of laminate spallation generated by high-velocity spherical metallic impactors
Weicheng Cui, Michael R. Wisnom and Mike Jones	299	Effect of specimen size on interlaminar shear strength of unidirectional carbon fibre-epoxy
B. Lauke, A. Schöne, J. Schuster and K. Friedrich	309	Temperature profile of a FIT tow passing a preheating chamber
C. Soutis	317	Damage tolerance of open-hole CFRP laminates loaded in compression
R. L. Woodward, G. T. Egglestone, B. J. Baxter and K. Challis	329	Resistance to penetration and compression of fibre-reinforced composite materials
S. K. Mazumdar and S. V. Hoa	343	Algorithm for filament winding of non-axisymmetric tapered composite components having polygonal cross-section on two-axes filament-winding machine
A. C. Mueller	361	A finite element method for microstructural analysis
David Hui	377	List of Reviewers for Vol. 3 (1993)
	379	Announcements

NUMBER 4

- Ronald C. Averill** 381 Static and dynamic response of moderately thick laminated beams with damage
- Rakesh K. Kapania and Tom-James G. Stoumbos** 397 Geometrically nonlinear impact response of thin laminated imperfect cylindrical panels
- Reaz A. Chaudhuri and Humayun R. H. Kabir** 417 Effect of boundary constraint on the frequency response of moderately thick flat laminated panels
- Jianqiao Ye and K. P. Soldatos** 429 Three-dimensional vibration of laminated cylinders and cylindrical panels with symmetric or antisymmetric cross-ply lay-up
- Rong-Sheng Chen** 445 Effect of curing process on mechanical properties of honeycomb-core sandwich plates •
- T. S. Srivatsan and E. J. Lavernia** 459 Cyclic strain resistance of a spray-atomized and -deposited cast aluminum-alloy metal-matrix composite
- 473 Announcements

NUMBER 5

- Timothy W. Taylor, Adnan H. Nayfeh and James E. Wade** 475 Dynamic response of thick anisotropic composite plates
- O. Onipede, S. B. Dong and J. B. Kosmatka** 487 Natural vibrations and waves in pretwisted rods
- Mario E. Pachajoa, Kung-Yan Lee and James D. Lee** 503 Progressive failure analysis of composite structures made of thermo-elastic solids
- S. A. Meguid, A. L. Kalamkarov and A. Zougas** 525 Analysis of local and effective elastic properties of fibre-reinforced materials
- Xiaozhen Liang and G. R. Heppler** 537 Manufacturing tolerances to meet laminate CTE design criteria
- Pascal B. Xavier, C. H. Chew and K. H. Lee** 549 An improved zig-zag model for the vibration of soft-cored unsymmetric sandwich beams
- 565 Announcements

NUMBER 6

- A. Baz and J. Ro** 567 Optimal vibration control of NITINOL-reinforced composites
- Robert Butler and Vittal Rao** 577 Optimal control of infinite-order smart composite structural systems using distributed sensors

J. B. Greenberg, Y. Stavsky and A. Soloveychick	591	Theory of bending and stretching of orthotropic sandwich cylindrical shells with dissimilar facings
S. T. Dennis, B. A. Horban and A. N. Palazotto	605	Instability in a cylindrical panel subjected to normal pressure: bifurcation vs nonlinear analyses
Autar K. Kaw and Jiafei Ye	621	Comparison of axisymmetric and planar fracture mechanics models for fiber-reinforced composites
Anwarul Haque, Hassan Mahfuz, Cynthia Ingram and Shaik Jeelani	637	Response of thermoplastic and thermosetting composites under compressive loading—an experimental and finite element study
A. G. Mamalis, D. E. Manolacos, G. A. Demosthenous and M. B. Ioannidis	653	Axial collapse of thin-walled fibreglass composite tubular components at elevated strain rates
	679	Announcements
NUMBER 7		
X. R. Xiao, C. C. Hiel and A. H. Cardon	681	Characterization and modeling of nonlinear viscoelastic response of PEEK resin and PEEK composites
E. S. Reddy and Wieslaw K. Binienda	703	Prediction of crack initiation in unidirectional composite beams subject to four-point bending
F. Ju, H. P. Lee and K. H. Lee	715	Free-vibration analysis of composite beams with multiple delaminations
James T. S. Wang and J. T. Huang	731	Strain-energy release rate of delaminated composite plates using continuous analysis
Sherrill B. Biggers, Jr and Thomas M. Browder, Jr	745	Buckling-load interaction in tailored composite plates
Tungyang Chen and Su-Hong Liu	763	A transformation-field analysis of thermomechanical stresses in particulate metal-matrix composites
Theodore Nicholas and Lt. J. Jay Updegraff	775	Modeling thermal fatigue damage in metal-matrix composites

NUMBER 8**CURRENT TRENDS IN
COMPOSITES RESEARCH**
